

Questions to Ask Your Doctor about Clinical Trials

Here are some questions to ask your doctor to help you determine if a clinical trial is right for you.

- What is the purpose of the trial?
- What phase is the clinical trial?
- Why would the clinical trial treatment be better than treatment being used now?
- How long do I have to decide whether I want to participate in a clinical trial?
- How does the clinical trial treatment work to treat my brain or spine tumor?
- What are the criteria used to determine if I am eligible for the trial?
- How do you evaluate if the treatment is working?
- How often would I need to have imaging or MRIs?
- How long is the treatment given?
- How will I be informed of the results?
- If the treatment isn't work, can I stop the trial?
- Can I stop participating in the trial at any point I choose?
- What procedures are required as part of the clinical trial?
- If the clinical trial is a drug therapy, how is the drug given (pills or IV)?
- How often do I have to be seen in the clinic or hospital as part of the trial?
- Can I be part of the clinical trial at a location closer to my home?
- What are the known side effects?
- How are side effects managed?
- Are there other health risks with participating in the trial?
- How could the trial affect my daily life?
- What are the costs to me for participating on this trial?

Clinical Studies

NCI-CONNECT has studies available that focus on rare CNS tumors.
